## About me

I'm a self-taught Web developer more focused on the Frontend, currently with the React.js library and the Next.js framework, but constantly learning about new frameworks/libraries.

## Skills

Html

Css

Sass

Javascript

Typescript

React JS

Next JS

Node JS

Express JS

MongoDB

Graphql

Git

Npm

## Languages

Spanish (Native)

English (Advanced)

# Lautaro Perez Herrera

Front-end Developer with Back-end knowledge

## EXPERIENCE

### Shareit

I created a website where developers can register and upload their projects, share them with the community and have feedback of their work.

They can also comment on other people's posts and it has a raking to see who is making more projects and encourage them to keep coding!

It's made with **Next.js**, **Firebase** and **Tailwind CSS**.

Link: "[Shareit](#)"

### Music uploading app

I wanted to make a website to upload my music and practice **Next.js** and **Firebase** in the process.

It's made with **Next.js** and it has **Firebase authentication**, **Firestore Database** for the music upload and **Firebase storage** for the images and audio.

You can search and sort by genres.
